

GRADING

Criteria

Complete summary of hypotheses and tests for all components of the strategy (overall strategy theory, indicators, signal process, rules)

Describe Constraints, Benchmarks, and Objectives of Strategy

Data Description

Describe Indicators, Test indicators separately from the strategy

Describe signal process, test signal process separately from the overall strategy

Describe Rule process, test rules incrementally

Assess optimization of parameters

Apply walk forward analysis, discuss choice of objective function and impact on parameter choice

Assess Overfitting

Extend the analysis with other asset classes, additional similar techniques, or more sophisticated models

- all categories are worth 10 points
- 'Excellent' (10 pts) is publication quality
- no points for having nothing in your project for that criteria
- substitutions OK, with discussion

Since grading a bit more harshly, will apply a helpful curve to improve the final scores.
